## Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

## SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

HELPFUL HINTS

•*Certification Process Review*• The Office has begun a complete review of certification processing with the goal of streamlining operations to better meet customer needs. All of the supervisors and managers in the certification area, as well as employees, are involved.

As part of the review, several meetings with certification customers hanve been held to ensure that customer views are heard and to share the findings and recommendations derived during the certification process review. Customer mectings will continue to be held the third Wednesday of each month. Anyone interested in attending these meetings should contact the Assignment/Certification Services Division on (703) 557-7770.

Following is a series of helpful hints that have been developed to date as a result of the certification process review meetings.

•*Use Complete Application Number*• When ordering certified copies of patent and trademark applications, please identify the document by its complete application number. .he application number includes the two digit series code (Examples: patents-06, 07; trademarks-73, 74) and six-digit serial number.

•*Authorization to Order Certified Copies of Applications as Filed*• When requesting a certified copy of a patent application as filed, if either the attorney of record has changed since filing or a power to inspect has been filed, please provide a copy of the new power of attorney or the power to inspect. The Certification Branch prepares the bulk of certified copies of applications as filed from the microfiche that contains information pertaining to the attorney of record at the time of filing. When a change in attorney of record is made, or when a power to inspect has been filed, this information is not readily available to the Certification Branch unless it is provided with the request.

•*Ordering Different Products from Certification Branch*• When ordering copies from the Certification Branch, whenever possible request only one type of service per order to speed processing. Example: a request for a copy of a patent application as filed should be seperate from a request for a patent file wrapper and contents.

•*Expedited Orders for Certified Copies of Applications as Filed*• When submitting requests for expedited certified copies of patent applications as filed, please include no more than three different application numbers on one request. The Certification Branch fills all copies from one request as a complete order. The Office's experience has been that orders which have no more than three application numbers can be filled and delivered most quickly within our five-day service goal; orders with a large number of individual application numbers often result in one or more applications requiring special research or handling which can slow the process. For example, better service can usually be given on five individual orders with three applications numbers on each one rather than one order with 15 application numbers on it.

In addition, some customers are using terms such as "rush" or "special" on every order they place; other customers use those terms to identify requests they want to be filled within five days. Please refrain from using the words such as "rush" or "special" and only use the term "expedite" when you have requested and paid for five-day expedited service.

•*Refunds*• The U.S. Patent and Trademark Offie is prohibited from providing refunds to customers except in situations where the Office failed to properly fulfill the request. The Certification Branch, therefore, cannot provide refunds for customers who no longer need a service or for "a mere change of purpose after the payment of money." See 37 CFR 1.26.

## Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

# SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

## SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
